PREFACE

TO THE SEVENTY-SIXTH VOLUME.

AMONG the chief reliances of the traitor leaders in the great rebellion of the slave states of the Union, on which they based their hopes of success in their unholy revolt, was the distress which the people of the North must experience from being deprived of the trade of the South; and this fallacious hope was greatly fortified, too, by certain organs of public opinion in New York, which foretold the dismal consequences to the Commercial Metropolis of the New World if King Cotton withdrew the light of his benign countenance from us. Ships were to lie rotting at our wharves, omnibus horses were to be pastured in Broadway, and desolation was to prevail in our once thronged thoroughfares. But we knew too well the sources of prosperity which have contributed to the commercial greatness of New York to indulge in any such disheartening visions of the future; for we have been too many years accustomed to feeling the pulse of this vast community by collecting its most vital statistics, not to be able to detect the first symptoms of decrepitude or premature decay. Our predictions of last year have been fully verified by the unerring results exhibited in the pages of the DIRECTORY for 1862–'3. Instead of any decrease in the population of the city, the number of names, which may be regarded as an infallible indication of the condition of the people, shows a considerable increase of population during the first year of the Rebellion. In the last year's DIRECTORY, the number of names was 152,825, while the present year it contains 153,186. Doubtless this will be contrary to the anticipations of many shrewd calculators, for there has not only been a considerable falling off in the aggregate of foreign immigration at this port, but a vast number of our active business young men and mechanics have gone off as volunteers in our army and navy. Probably no other city in the Union will be able to show an increase of population during the first year of the Rebellion.

The causes which have led to this result are very obvious. New York has continued to be the great depot for the importing and exporting business of the nation; it has been the financial centre of the continent, and the vast supplies for the army and navy have in some way been drawn from it. A vast amount of the commerce of the West, which, before the Rebellion, found its natural channels over the railroads of the Gulf States and down the Mississippi, has been diverted hither, and will continue to flow here for many years after the old relations of the Union shall be restored.

It is not unlikely that the increase in the population of the city during the past year of disasters has been considerably greater than even the increase of names would indicate, for it must be remembered that no attempt has been made at a complete canvass of the entire Island, the thorough canvass not extending above 60th street, except in the principal streets of Yorkville and Harlem.

The tremendous events of the past year, though, while they did not so seriously affect the general prosperity of the city as had been anticipated, operated very greatly to the disadvantage of the DIRECTORY, by disturbing the regular course of business, and preventing that degree of accuracy in collecting the information necessary to the complete accomplishment of our purpose, which we have aimed at in the compilation of the work since it fell into the hands of the present publishers. The few errors which may have been discovered in the last volume, and which have been guarded against in the present one, were not the result of any diminution in the force employed in gathering the names, nor in the neglect of any possible precautions to guard against inaccuracies, but from the inevitable accidents arising from the extraordinary excitements and perturbations of society, which were at their height during the brief time in which our employees were engaged in the work of canvassing the city. The number of men employed in this work is about a hundred and fifty, and of these the greater part are necessarily inexperienced and new to the business; the new hands being engaged in collecting the names, while the old and experienced ones are employed in the more difficult work of revising and arranging the lists as they are handed in. None but those who have had opportunities for inspecting the work of compiling the DIRECTORY, can have any adequate conception of the amount of labor which it involves, and the watchful attention necessary to prevent errors and damaging mistakes.

One of the injurious effects of the Rebellion, as felt by the DIRECTORY, in addition to a considerably reduced sale of the work, has been in the diminution of advertisements, to which the proprie-

tors have had to look for the remuneration of their outlay of capital and labor—the work being sold at so small a price that the receipts from its sale alone will hardly meet the cost of its publication, it being beyond all question the cheapest of all cheap publications, when the quantity of its information and the cost of its production are taken into consideration. To advertisers, no other channel of communicating with the public offers half the advantages at ten times the cost. An advertisement in a daily paper is read but once, if read at all, and even then by a very limited circle; but the DIRECTORY, being consulted every day in the year by all classes of people, an advertisement in it stands a better chance of being seen by everybody than it would have in any other place, unless it were written upon the sky; for the DIRECTORY is neither sectional nor sectarian; it excites no man's prejudices, and it contains information which no person is so learned as to be able to neglect. It is a book for everybody, for strangers as well as for denizens of the city; and, whether those who consult its brim-full pages look into it for advertisements or not, they cannot help seeing them if they be there, and remembering them from seeing them so often.

It has become, of late years, a very common practice for the commission and other agents of foreign manufacturing establishments in New York to claim the right to insert in the DIRECTORY the names of the houses and establishments they represent, while they withhold their own. To consent to such a demand as this would be committing a virtual fraud upon the public, for non-residents have no claim, nor right, to appear in the DIRECTORY, except as advertisers, and it is only as such that their names can be admitted. Those who desire further information in relation to the foreign establishments in question, will find it, with the names of their agents, in the COPARTNERSHIP DIRECTORY, published annually about the first of August.

We published, last year, a table of the initial letters of the surnames contained in the DIRECTORY, showing the relative number of each, not as a matter of curiosity only, but of essential service in a good many different ways. We do not repeat it this year, for the reason that there is no essential change in the relative number of the initials—the M's, as before, being the most numerous, and X's the least so.

Diamonds, Jewelry, Watches, Silverware, Bronzes, & Fine Military Goods.

BATCHELOR'S LIQUID HAIR DYE.

The ORIGINAL and only PERFECT Hair Dye ever yet produced.

This splendid preparation produces IMMEDIATELY any shade of Brown or a glossy Black, natural in appearance, and harmless in its effects, leaving the hair quite soft and silky. Its continued use does not injure the hair nor stain the skin; but, on the contrary, it remedies the evil effects of bad Dyes, and

INVIGORATES THE HAIR FOR LIFE,

Frequently restoring it to pristine Vigor and Vitality.

SPECIAL NOTICE.

This ORIGINAL and CELEBRATED DYE has attained a very enviable reputation in every part of the United States, England, France, Central and South America, the East and West Indies, and other parts of the world, which reputation has excited the cupidity of a host of imitators and counterfeiters, who have flooded the market with their worthless and injurious compounds, inflicting RIDICULE and DANGER upon the unfortunate purchaser.

To avoid all this DANGER and RIDICULE, be sure that you obtain the GENUINE, ORIGINAL, SURE and SAFE ARTICLE.

WM. A. BATCHELOR'S HAIR DYE,

MANUFACTURED BY

CHARLES BATCHELOR, Proprietor,

81 *Barclay Street*,

Late of 233 BROADWAY, and 16 BOND STREET,

NEW YORK.

Sold by all Respectable Druggists and Perfumers.

ELIE CHARLIER'S

French and English Institute

FOR YOUNG GENTLEMEN,

Boarding and Day School, Classical and Commercial,

Nos. 48 & 50 EAST 24th STREET,

NEAR MADISON PARK, Between 4th & Lexington Aves.

THIS School is now in its *Seventh* year. Its pupils are to be found at *West Point*, in the *Navy School*, in the *Army*, in the *Counting House*, many *Colleges*, and *Professions*.

The studies pursued embrace all the studies necessary for a liberal instruction. Pupils can commence when *Six* years of age in the *Primary Department*, and continue until they are seventeen or eighteen, ready for their future profession.

German, Spanish, and French are taught by native teachers. American pupils are *obliged to speak French*, the only way to acquire it in a foreign country.

As heretofore, I will devote to my school all my time and energy; surrounded with excellent teachers, and all the resources presented by a large city, I will do my utmost to continue to deserve the confidence and esteem of my pupils' parents. A few pupils are received as boarders. There is but one table for pupils, teachers, and my own family

Gymnastics, military drill, singing, and drawing are regularly taught.

Complete *obedience*, *cheerful* and *prompt obedience*, truth in everything, and *work*—such are my rules. I shall not fail to enforce them, even if I have to dismiss any pupil refusing compliance with them, or exerting an evil influence in the school. The classes in my Institution may be visited at all times by the parents or guardians of the pupils.

It is a rule with my assistants and myself to accustom our pupils to use their powers of reflection and of reasoning throughout the course of their studies. We do not ask them to work beyond their powers, but require strictly the performance of their tasks; in a word, we wish them to exert themselves conscientiously.

THE ACADEMIC YEAR, 1862-'63, will extend from the 16th of September to the end of June, divided, for the payments, into two sessions of twenty weeks each. All bills payable in advance, semi-annually. Pupils are charged for the entire Academic year, except new pupils, who are charged from the date of their admission to the end of the school year.

Hours of Attendance for Day Scholars.—From five minutes before 9 A.M. till 3 P.M. (with recess). In the Primary Department, pupils, if desired, may leave at 2 P.M., or even at 12 M.

A report of the attendance, deportment, and proficiency of the pupil, is sent to his parents every other week, or weekly, when desired.

For all details, terms, and further information, see the Prospectus of the School.

The following gentlemen have had sons, grandsons, &c., under my charge:

FOR SEVEN YEARS CONSECUTIVELY—James J. King, banker; Maj.-Gen. James S. Wadsworth.

FOR SIX YEARS—Wm. Barton, banker; E. Lahens, merchant; D. D. Lord, lawyer; Reuben W. Howes, Bank president; H. K. Bull, merchant; Rudolph A. Witthaus, merchant.

PATENTEES AND MANUFACTURERS OF

EMERY'S PATENT CHANGEABLE RAILROAD HORSE POWER.

ALSO LEVER POWERS,

For Four, Six and Eight Horses, of new and superior construction, together with a great variety of labor-saving

AGRICULTURAL MACHINERY.

ALSO

General Dealers in Implements and Seed.

HORSE POWERS.

It has ever been the aim of the proprietors to make none but the first class of work, and always use the best materials and workmanship. In the construction of their Horse Powers they have endeavored to adapt them most readily and advantageously to the great variety of purposes required by the Farmer and Mechanic. The same considerations have guided them in the construction and adaptation of the various Machines made and sold by them, and to be driven by the power, in calculating their various velocities, forces, pulleys and geers, required to enable them to operate in their maximum efficiency, which is the great secret of their success.

THRASHING MACHINES
WITH
SEPARATING AND CLEANING ATTACHMENT,

Combined and adapted for all kinds and conditions of grain, &c.

This machine is the greatest success in its line yet produced. It can be operated with two horses as easily, and with equal results, as the ordinary thrashing machine without the cleaning attachment; while its capacity adapts it equally well to the force of four or six horses.

It will thrash perfectly clean from the straw, and clean the grain for market without any wastage in any part of the process.

It is complete in one frame. Very compact and simple—runs light, still, and without any concussion from its moving parts. It has been very extensively used during the past two harvests, and its superiority over any others in market established beyond question, and considering its capacity and cost of construction it is at least fifty per cent cheaper than any other similar machine in use.

CLOVER MILLS AND CLEANERS.

This is a new Machine comparatively, and is believed to be one of the best Machines for the purpose ever made; can be driven by one, two, or more horses at a high or slow velocity, and do equally good work, and with wet and bad, as well as good condition, of the clover chaff. It cleans the seed and delivers it fit for market at the same operation.

STALK AND STRAW CUTTERS

For Horse Power—a strong and durable Machine, and adjustable to any length of cut.

SAWING MILLS,

With Circular Saws for Cutting Fire-wood, Slitting Boards, Plank, &c., for fencing and building purposes; also with Machine Cross-cut for cutting Logs for Wood, Shingles, Staves, &c.; also Mills for making Shingles.

FEED MILLS

For Grinding all kinds of Grain for Feeding, as well as corn in the ear when desired. Several sizes, and with or without Sieves and Bolts attached.

CIDER MILLS

For Power and Hand use, with and without Press attached. These Mills and Presses are of a superior style and utility to any others in use.

COTTON GINS
WITH
COTTON LINT CLEANER AND CONDENSER.

Cotton Gins with improved Feeding Hoppers, with 30 to 100 Saws, calculated for one to eight horses. These are superior in finish and adaptation to the wants of the Cotton Grower, to anything of the kind before offered to the public.

The Lint Condenser is an attachment suited to any ordinary Cotton Gin; it receives the lint as it is discharged from the gin, condenses it and delivers it compact, ready for the press at one and the same operation, and at the same operation cleanses it from all earthy matter, as sand, dust, &c. It dispenses with the necessity of any lint room and large buildings, as the Gin may be equally as advantageously used in the field as the grain thrasher, and when used in buildings it requires no more additional room than the size of the Gin itself occupies. It is also a perfect safeguard against fire, as it is impossible for burning lint to pass through the machine without the fire being extinguished in its passage, thus making this Cotton Gin with its condenser fire-proof. They have been extensively used in Georgia the past two crops, and the cotton made by them has commanded an advanced price over that ginned by the best machines in use.

AGRICULTURAL IMPLEMENTS

Constantly on hand, embacing a large and selected assortment of Plows, Harrows, Cultivators, Dog Powers, Churns, Cheese Presses; also Forks, Hoes, Shovels, &c., always on hand at the lowest manufacturer's terms.

ILLUMINATED CATALOGUE.

The Proprietors have completed their new Catalogue the most complete and beautifully illustrated work ever published by any manufacturer, embracing a great number and variety of finely executed and carefully prepared

Illustrations and Descriptions,

together with ample references and indexes as well as the Prices, Terms of Sale, Weight, Cubic Measurements, Capacity, Directions for use, Durability and Warranty of their

Machinery, Implements, and Seeds.

On receipt of three cents in stamps to prepay postage, it will be sent to all applicants. Local Agencies solicited for the sale of the above Machines.
